The Vertex Air2 XL4™ pond aerator is a super-efficient, affordable and safe system. In a typical pond, an Air2 XL4™ can aerate approximately 3-5 acres depending on shape, slope, oxygen demand and other factors. A 1/2hp (0.37kW) Brookwood™ SafeStart™ compressor, housed in our rustproof aluminum outdoor cabinet, feeds two bottom mounted XL AirStations™ utilizing Vertex’s MicronBubble™ technology. The rising force of millions of bubbles circulates the entire water column, entraining bottom water up to the surface allowing vital oxygen to be absorbed and poisonous gasses expelled. With no electricity in the water, Vertex’s aeration systems are safe for any type of water recreation.

Our systems have a full 3-year warranty, excluding wearable parts (air filters and compressor maintenance kits) plus a Limited Lifetime warranty against rust and corrosion on the cabinet, 5-year warranty on the AirStations™ and a 15-year warranty on BottomLine™ supply tubing.
SPECIFICATIONS: AIR2 XL4™ LAKE AERATION SYSTEM

BROOKWOOD™ COMPRESSOR
1/2hp (0.37kW), 115v or 230v, Single Phase piston type compressor. Built for continuous 24/7 operation and equipped with Vertex SafeStart™ technology allowing auto restart under maximum rated pressure without motor damage. Super-duty Brookwood™ compressors incorporate upgraded rotors, stators, valve plates, bearings and capacitors and are thermally protected, oil-free, and require no lubrication; just periodic cleaning of included washable air filter. Extended duty cycle is approximately 2-3 years for compressor maintenance, about 2 to 3 times the duty cycle of ordinary piston and rotary vane compressors. All Brookwood™ SafeStart™ compressors carry a 3-year warranty, excluding wearable parts (air filters and compressor maintenance kits).

QUIETAIR™ CABINET
Enclosure comes equipped with cam lock for security, fully gasketed and constructed of aluminum with gray electrostatically-bonded powder coating to provide Limited Lifetime warranty against cabinet rust and corrosion. Enclosure furnished with stamped ventilation or grill to insure forced air circulation and an integral cooling fan with thermal protection, producing 290 CFM to guard against excessive compressor operating temperatures. Cabinet provided with HDPE mounting pad. Enclosure comes with a GFCI protection on both the compressor and fan circuits. Quick disconnect switch included. Side mounted muffler box and additional insulation optional for quieter operation.

AIRSTATION XL4™ ASSEMBLY
Each CoActive Airstation™ consists of four self-cleaning, 9” diameter flexible membrane diffusers of EPDM compound with 100% rebound memory, each producing millions of fine 500 to 3000 micron bubbles. Each diffuser station is equipped with a vacuum-formed HDPE base; sonic spot-welded to provide unit integrity. Base unit has a hollow chamber design for the addition of gravel ballast and a lipped design to prevent settling into soft bottom sediments. AirStations are independently tested and verified to provide stated pumping rates. 5-year warranty.

BOTTOMLINE™ SUPPLY TUBING
Self-weighted, direct burial submersible tubing for connection from compressor to diffuser stations. Tubing is flexible PVC composite construction for use with standard PVC solvent weld cement and insert fittings. Tubing has 0.58” I.D. and high wall thickness for long term durability and protection against punctures. Remains flexible in cold temperatures.
