The Vertex LL7 XL5™ aeration system, designed for larger lakes and reservoirs, utilizes Vertex’s latest technology to provide the most aeration for your money. Four super-duty, Brookwood™ twin cylinder HighFlow™ compressors, housed in our rustproof aluminum outdoor cabinet, providing over 20 CFM of air, feeds seven of our bottom mounted XL5 AirStations™. The rising force of millions of bubbles circulates the entire water column, entraining bottom water up to the surface allowing vital oxygen to be absorbed and poisonous gases expelled. With no electricity in the water, Vertex’s aeration systems are safe for most any type of water recreation.

Our systems have a full 3-year warranty, excluding wearable parts (air filters and compressor maintenance kits) plus a Limited Lifetime warranty against rust and corrosion on the cabinet, 5-year warranty on the AirStations™ and a 15-year warranty on BottomLine™ supply tubing.
SPECIFICATIONS: LL7 XL5™ LAKE AERATION SYSTEM

BROOKWOOD™ HIGHFLOW™ COMPRESSOR
Four 3/4hp (1.12kW), 230v, 22.4 total CFM, 25 PSI, single phase, thermally protected twin cylinder piston type compressors. 50 & 60 Hz. UR, CE, CSA listed and built for continuous 24/7 operation. Super-duty Brookwood™ HighFlow™ compressors incorporate upgraded rotors, stators, bearings and capacitors and are thermally protected, oil-free, and require no lubrication; just periodic replacement of air filter. Extended duty cycle is approximately 2 to 4 years for compressor service, about 2 to 4 times the duty cycle of ordinary piston and rotary vane compressors. All Brookwood™ HighFlow™ compressor systems carry a 3-year warranty, excluding wearable parts (air filters and compressor maintenance kits).

QUIETAIR™ CABINET
Enclosure comes equipped with cam lock for security and exterior disconnect switch for safety. Fully gasketed and constructed of aluminum with gray electrostatically-bonded powder coating to provide lifetime warranty against rust. Enclosure furnished with stamped ventilation grill to insure forced air circulation and integral redundant cooling fans, producing 870 CFM to guard against excessive compressor operating temperatures. This system is equipped with Vertex SafeStart™ technology allowing auto restart under maximum rated pressure without motor damage. Cabinet provided with HDPE mounting pad. 230V system requires the purchaser to provide GFCI protection on their electrical supply circuit. ETL Listed. Quick disconnect switch included. Side mounted muffler box and additional insulation optional for quieter operation.

AIRSTATION XL5™ ASSEMBLY
Diffuser station consists of five self-cleaning, 9” diameter, flexible membrane diffusers of EPDM compound with 100% rebound memory, each producing millions of fine 500 to 3000 micron bubbles. Includes FlowControl™ technology that equalizes airflow to all diffusers on uneven bottoms and StableTrak™ technology which stabilizes the bubble column increasing lift velocity. Each diffuser station is equipped with a vacuum-formed HDPE base, sonic spot-welded to provide unit integrity. Base unit has a hollow chamber design for the addition of inert pea gravel ballast and a lipped design to prevent settling into soft bottom sediments.

BOTTOMLINE™ SUPPLY TUBING
Self-weighted, direct burial submersible tubing for connection from compressor to diffuser stations. Tubing is flexible PVC composite construction for use with standard PVC solvent weld cement and insert fittings. Tubing has 0.58” I.D. and high wall thickness for long term durability and protection against punctures. Remains flexible in cold temperatures.
